

# stay connected embrace mobility

## Introducing the E-Mobile Suite™ The Newest Addition to the E-Notification™ Family

E-Mobile Suite is a component of the E-Notification System that allows users to access a mobile-friendly version of their E-Notification™ accounts from any connected mobile device. Users with E-Mobile Suite may view their E-Larms, E-Reports, E-XLs, and E-PBs on any connected mobile device.

# Main

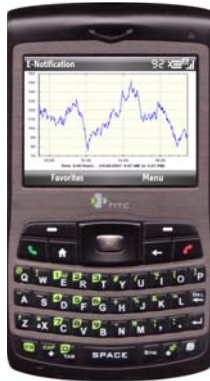

## PI Data on your phone

### Interface closely resembles its desktop sibling

The E-Mobile Suite allows you to go mobile with your critical process data. The software is easy to use and requires no mobile device programming! The E-Mobile Suite helps you stay connected. The E-Mobile main page closely resembles its desktop sibling, allowing your process data to be viewed on any mobile device. Current snapshots of all E-Notification components – E-Larms, E-Reports, E-PBs, and E-XLs – are available anywhere, securely, via VPN or BlackBerry Server.

# E-Larms

## Alerts, Trigger Reports and more

### Access all of your E-Larms quickly

Access your E-Larms quickly, and view current tag values that refresh on demand! Trend any PI point or PIPE expression! Keep an eye on Key Performance Indicators (KPIs) via E-Larms on any mobile device. Access critical process data with one mobile browser click. View current trends of your data or view graphical data leading up to an event. E-Larms are conveniently color coded for quick identification of alarm status.

# E-PBs & E-XLs

## At-a-glance or full detail

### Visualize your data and look at what you want

Visualize your data quickly and conveniently using familiar PI tools. Take your ProcessBook or Excel screens with you. An updated ProcessBook screen is one click away on any mobile device. Leveraging the power of Excel and PI-Datalink, E-Notification's E-Mobile Suite makes your Excel reports available on-the-go. View the full screen at a glance or click to enlarge.

# OS Integration

## Easily accessible

### Components are always within reach

E-Notification includes feature-rich integration with BlackBerry devices used within a corporate network. By receiving icons directly on your Blackberry desktop in real time, you will never miss an alert.
